PROFESSIONAL PROJECT HANDLED

Project Title 1: LetsTalk for K12insight.com

About: LetsTalk is a cloud-based customer servicing platform meant for school districts present in the U.S. IT was already developed in VB.net and currently it is being converted into MVC.

Environment: ASP.NET MVC with C# and MySQL for the back end. Also used HTML, JavaScript, JQuery, Bootstrap, Jason.

Job Description: Developing latest requirements as updates as per requirements communicated by the Product Development team. Solving relevant and important bugs which are reported by the Quality Assurance Team. Mainly engaged in planning and delivery of builds on a timely basis.

URL: - <https://www.k12insight.com>

Responsibilities:

Developing the Code as per the requirements.

Developing the HTML pages.

Writing UI / Business validations for the owned use cases.

Unit testing and integration testing of owned use cases.

Duration: May 2018 to till date.

Project Title 2: "Learning Portal".

Environment: ASP.NET MVC with C# and MySQL for the back end. Also used HTML, JavaScript, JQuery, Bootstrap, Jason.

Description: Learning Portal is optimized for learning, testing, and training. Examples might be simplified to improve Animation for Paint Department, Roto for View D Department and basic understanding. Tutorials, Video's references, and examples are constantly reviewed to avoid errors, but we cannot warrant full correctness of all content. While using this site and Simplify for trainer easily added batch for any student for any location.

Responsibilities:

Developing the Code as per the requirements.

Developing the HTML pages.

Writing UI / Business validations for the owned use cases.

Unit testing and integration testing of owned use cases.

Duration: Nov 2017 to April 2018.

Project Title 3: MyHRIS

Environment: ASP.NET MVC with C# and MySQL for the back end. Also used HTML, JavaScript, JQuery, Bootstrap, Jason.

Description:

An HRIS, which is also known as a human resource information system or human resource management system ([HRMS](#)), is basically an intersection of human resources and information technology through HR software. This allows HR activities and processes to occur electronically. Similarly, an HRIS allows employees to exchange information with greater ease and without the need for paper through the provision of a single location for announcements, external web links, and company policies. This location is designed to be centralized and accessed easily from anywhere within the company, which also serves to reduce redundancy within the organization.

Responsibilities:

Developing the Code as per the requirements.

Developing the ASP.NET MVC pages.

Writing UI / Business validations for the owned use cases.

Unit testing and integration testing of owned use cases.

Deployment on IIS.

Duration: Feb 2017 to Nov 2017.
